Forecast for Saturday 28 Nov 2020

Weather: Today will be dominated by extensive low cloud across all areas with early spells of rain, locally heavy, followed by spells of drizzle.

Chance of cloud free mountain/hill tops above 600m: Virtually no chance with cloud extensive above 300-500m, although this afternoon there is a 20% of some limited breaks developing across sheltered western areas.

Visibility: Mist or fog will dominate above modest elevations, below which the visibility will be moderate or poor this morning, and also with drizzle this afternoon and evening. Otherwise moderate or good visibility, most likely across sheltered western areas this afternoon.

Freezing Level*	1800m	2000m	2000m	2000m	2100m	2100m	2100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Poor visibility hampering navigation for much, if not all, of today. Best conditions across the more sheltered west.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sat 28 Nov 2020	0.2mm	0.4mm	1.8mm

Forecast for Sunday 29 Nov 2020

Weather: Another mainly overcast and rather dull day with persistent hill fog across most areas, as well as in the valleys at times. However, some bright or sunny spells are likely across the west but these likely limited in extent and duration.

Maximum wind: 5-10mph, variable in direction.

Chance of cloud free mountain/hill tops above 600m: 10% with cloud rather extensive and persistent above 300-500m.

Visibility: Generally no more than a kilometre or two above modest elevations. Much improved at low levels and perhaps across western hills.

Temperature: **Valleys:** 6 to 8 Celsius.
At 600m: 3 or 4 Celsius.
Freezing level: Above summits.
